The Spokane Regional Transportation Council (SRTC) is inviting you to participate in the Spokane Regional Transportation Study. We are conducting this survey to collect accurate information about residents' day-to-day travel throughout the region.

By taking part, you'll help us understand how local roads, highways, public transportation, bike lanes, and sidewalks are used today, and how they can be improved to make travel better in the future. We want to hear from you even if you don't travel often. Your input will have a big impact because only a limited number of households have been invited to participate in the survey. Follow the instructions below to sign up today. Your voice can shape the future of your community.

Guiding Principles and the Metropolitan Transportation Plan Update

TTC

Agenda Item 10 | Page 21

Jason Lien

April 24, 2024

What is the Metropolitan Transportation Plan?

- **What we want our regional transportation system to look like during the planning horizon.**
- **What we're going to do to support that outcome.**

New - Equity Guiding Principle

- Outgrowth of Equity Planning Framework
- Recommendations adopted by Board in Dec. 2022
- Formalize consideration of equity in SRTC's planning processes

The screenshot shows the SRTC Equity Statement document. At the top right is the SRTC logo (Spokane Regional Transportation Council). Below it is the section header "Equity Statement". The text describes the SRTC's mission to ensure equitable access to transportation for all community members, regardless of their economic, social, ethnic, race, age, sexual orientation, physical, mental, or geographic circumstances. It defines equity as action to promote fairness and remove barriers. It also defines race equity and the goal of equity in transportation. The document includes a section titled "What is the Equity Planning Framework?" which describes the process of developing the equity planning framework. At the bottom, there are three footnotes providing sources for the definitions and framework information.

SRTC
SPOKANE REGIONAL TRANSPORTATION COUNCIL

Equity Statement

The Spokane Regional Transportation Council's (SRTC's) mission is to ensure that all Spokane County residents have access to safe and reliable transportation options that support economic opportunity and quality of life regardless of a person's economic, social, ethnic, race, age, sexual orientation, physical, mental, or geographic circumstances. SRTC is committed to equitable delivery of its programs and services – and to pursuing equitable outcomes in the Greater Spokane community.

Equity is defined as action to promote fairness of opportunity for all people. This means removing barriers in day-to-day decisions, existing practices, and laws that deny everyone from fully participating in society.¹ The full Washington State definition of equity can be found within the State Office of Financial Management's Diversity, Equity, and Inclusion Glossary.²

Race Equity is defined as the vision or existence of a community, society, or world in which race or color does not predict the amount and quality of opportunities, services, and benefits.³

Equity in transportation seeks fairness in mobility and accessibility to meet the needs of all community members. A central goal of transportation is to facilitate social and economic opportunities by providing equitable levels of access to affordable and reliable transportation options based on the needs of the populations being served, particularly populations that are traditionally underserved.³

Equity gives all people a fair and just shot in life despite historic patterns of racial and economic exclusion. The ideal outcome of this work would be that transportation system burdens and benefits, as well as opportunities for all people, are no longer predictable by race or other identifiers.

What is the Equity Planning Framework?

The proposed equity planning framework includes the primary themes and recommendations which emerged from the 2022 equity planning work group and framework development process. The document has also incorporated additional feedback from SRTC's Transportation Technical Committee (TTC), Transportation Advisory Committee (TAC), and Board of Directors.

Equity Draft

Social equity and environmental justice issues should be considered as the Spokane region makes transportation planning decisions that will impact lives for generations. SRTC maintains that all people, regardless of their demographic characteristics or barriers they may face, should have safe, dependable, and accessible transportation infrastructure that connects to resources and opportunities and enables them to reach their full potential. As such, differences in the transportation system should not be predicted by race, class, or any other identity.

In Chapter 2, SRTC defines potentially transportation disadvantaged communities in terms of low income, disability status, lack of vehicle access, age dependency, minority status, and limited English proficiency. Transportation disadvantaged residents are present throughout Spokane County in both urban and rural environments, and statewide data indicates that these demographics are disproportionately represented as pedestrian victims in fatal and serious injury crashes. SRTC also considers vulnerable populations as defined in RCW70A.02.010.

Equity Draft Policies

7A. Tailor outreach to vulnerable and transportation disadvantaged communities as part of our planning and programming processes. Identify and elevate projects with community support as demonstrated by a robust and well-documented public engagement strategy including tailored outreach.

7B. Work to meet established safety targets and address fatal and serious injury crashes by supporting projects that build complete streets, mitigate modal conflict, and foster improved safety in areas where vulnerable and transportation disadvantaged residents make up a large share of the population.

Equity Draft Policies

7C. Ensure that all people can reap the benefits of a transportation network that connects them to key economic and quality of life destinations by addressing multimodal connectivity gaps and improving access to activity centers for transportation disadvantaged communities.

7D. Consider environmental justice and health disparities by referring to federal and state evaluation tools alongside local data.
