TITLE VI NOTICE TO THE PUBLIC

Spokane Regional Transportation Council is committed to non-discrimination in accordance with Title VI of the Civil Rights Act. No person shall, on the grounds of race, color, national origin, gender, gender identity and expression, sexual orientation, age, religion, veteran status, familial or marital status, medical condition, or disability, be excluded from participation in, be denied the benefits of, or otherwise be subjected to discrimination under any program or activity.

For more information contact SRTC's Title VI & ADA Coordinator Michael Redlinger at 509.343.6370 or mredlinger@srtc.org or by visiting the SRTC Title VI and Environmental Justice page at: https://www.srtc.org/about-srtc/title-vi-ej-ada/.

Any person who believes they have been affected by an unlawful discriminatory practice under Title VI has a right to file a formal complaint with SRTC. Complaints must be made in writing and filed with SRTC within 180 days following the date of the alleged discriminatory occurrence. For more information or to obtain a Title VI Discrimination Complaint Form, please go to https://www.srtc.org/about-srtc/title-vi-ej-ada/.

Americans with Disabilities Act (ADA) Information

All meeting sites are accessible to persons with disabilities. Accommodations for people with disabilities, including written materials in alternate formats, sign language interpreters, or other reasonable accommodations can be arranged by contacting SRTC's Title VI & ADA Coordinator Michael Redlinger at 509.343.6370 or mredlinger@srtc.org or contact.srtc@srtc.org at least 48 hours in advance.

This document can be provided in alternate languages upon request. Este document se peude proporcoinar en idiomas alternativos a pedido. Этот документ может быть предоставлен на других языках по запросу.

RESOLUTION of the BOARD of DIRECTORS of the SPOKANE REGIONAL TRANSPORTATION COUNCIL R 22-16 SRTC

APPROVING THE 2023-2026 TRANSPORTATION IMPROVEMENT PROGRAM (TIP) FOR THE SPOKANE METROPOLITAN PLANNING AREA

WHEREAS, the Fixing America's Surface Transportation (FAST) Act of 2015 requires metropolitan planning organizations to develop a four-year program of transportation facilities, programs, and services to be completed in the metropolitan area; and

WHEREAS, the Spokane Regional Transportation Council (SRTC Board) serves as the Metropolitan Planning Organization (MPO) for the Spokane Metropolitan Planning Area (SMPA); and as the Regional Transportation Planning Organization (RTPO) for Spokane County; and

WHEREAS, Horizon 2045 is the Regional Transportation Plan (RTP) for Spokane County; and

WHEREAS, the Horizon 2045 Metropolitan Transportation Plan for the Spokane Metropolitan Planning Area has been determined to confirm with Air Quality Plans; and

WHEREAS, Horizon 2045 has been approved by the SRTC Board; and

WHEREAS, the 2023-2026 Transportation Improvement Program has been developed on the contents, goals and objectives of Horizon 2045; and

WHEREAS, the 2023-2026 TIP for the SMPA has been developed based on the contents, goals, and objectives of Horizon 2045; and

WHEREAS, the 2023-2026 TIP has been developed under the direction of the SRTC Board in consultation with local government staff, Washington State Department of Transportation (WSDOT), Spokane Transit Authority (STA), and with input from various groups and members of the general public; and

WHEREAS, the draft 2023-2026 TIP document was made available for public review and provided a 30 day comment period; and

WHEREAS, the SRTC Board is responsible for approval of the TIP and the TIP must contain all federally-funded transportation projects in the SMPA prior to the distribution of funds to those projects; and

WHEREAS, the TIP must contain all regionally significant transportation projects in the SMPA requiring an action by the U.S. Department of Transportation, regardless of funding source, prior to the distribution of funds to those projects; and

WHEREAS, these projects must be included in the TIP before the funds can be used for these activities.

NOW THEREFORE, BE IT RESOLVED by the SRTC Board that:

- 1. The 2023-2026 TIP for the SMPA is hereby approved.
- 2. The Executive Director of SRTC is authorized to finalize and publish the 2023-2026 TIP and submit to WSDOT for inclusion in the State Transportation Improvement Program for transmittal to the appropriate agencies in the U.S. Department of Transportation.

PASSED and APPROVED this 13th day of October 2022 by the Spokane Regional Transportation Council Board of Directors.

Paul Schmidt, Council Member, City of Cheney Chair, SRTC Board of Directors

ATTEST

Julie Meyers-Lehman/Clerk of the Board

RESOLUTION of the BOARD OF DIRECTORS

of the

SPOKANE REGIONAL TRANSPORTATION COUNCIL

R-22-21

APPROVING THE FINIDING OF TRANSPORTATION CONFORMITY WITH AIR QUALITY PLANS FOR THE 2023-2026 TRANSPORTATION IMPROVEMENT PROGRAM UPDATE FOR THE SPOKANE METROPOLITAN PLANNING AREA

WHEREAS, the Fixing America's Surface Transportation (FAST) Act of 2015 required metropolitan planning organizations to develop a long-range intermodal/multimodal financially constrained transportation plan for each metropolitan area; and

WHEREAS, the Spokane Regional Transportation Council (SRTC Board) serves as the Metropolitan Planning Organization (MPO) for the Spokane Metropolitan Planning Area (SMPA); and as the Regional Transportation Planning Organization (RTPO) for Spokane County; and is responsible for developing a 4-year Transportation Improvement Program (TIP); and

WHEREAS, the 2023-2026 Transportation Improvement Program (2023-2026 TIP) is consistent with the Horizon 2045 Metropolitan Transportation Plan (Horizon 2045); and

WHEREAS, Horizon 2045 was developed in accordance with federal metropolitan transportation planning process requirements, as prescribed in Title 23, Code of Federal Regulations,, Part 450 (23 CFR 450) and other relevant regulations, including requirements for interagency consultation, financial constraint, and public participation; and

WHEREAS, Horizon 2045 conforms with Air Quality Plans, which include the Spokane CO Nonattainment Area Maintenance Plan (MP) and the Limited Maintenance Plan (LMP) for PM10; and

WHEREAS, the SRTC Board is responsible for local approval of the Transportation Conformity for the 2023-2026 TIP;

NOW THEREFORE, BE IT RESOLVED that the Board of the Spokane Regional Transportation Council that the 2023-2026 TIP for the Spokane Metropolitan Planning Area is hereby found to conform with the State Maintenance Plans for the Spokane CO and PM10 maintenance areas.

ADOPTED: November 10, 2022

Paul Schmidt, Council Member, City of Cheney

Chair, SRTC Board of Directors

Julie Meyers-Lehman, Clerk of the Board

INTRODUCTION

The Transportation Improvement Program (TIP) is a program of regional transportation projects planned for the next four years. The purpose of the TIP is to demonstrate that available resources are being used to implement the region's long-range transportation plan, also called a Metropolitan Transportation Plan (MTP), Horizon 2045.

SPOKANE REGIONAL TRANSPORTATION COUNCIL

As the federally designated Metropolitan Planning Organization (MPO) for the Spokane region, the Spokane Regional Transportation Council (SRTC) is responsible for developing the TIP.

SRTC is the lead agency for transportation planning and decision-making for the Spokane Metropolitan Planning Area (SMPA), which includes all of Spokane County.

The agency is governed by a Board of Directors made up of elected officials from member agencies and representatives from the following: Kalispel Tribe of Indians, Spokane Tribe of Indians, Washington State Department of Transportation (WSDOT), Washington State Transportation Commission (WSTC), Spokane Transit Authority (STA), a transportation private sector representative (major employer representative), a rail/freight representative and the Chairs of SRTC's Transportation Technical Committee (TTC) and Transportation Advisory Committee (TAC).

SRTC member agencies include all local jurisdictions and Tribes within Spokane County, WSDOT, STA, and WSTC.

Member agencies coordinate their transportation planning activities to help with the development of the TIP, MTP, Unified Planning Work Program (UPWP), Congestion Management Process (CMP), and planning studies.

For more information on SRTC's member agencies, advisory committees, please see Appendix A.

TIP DEVELOPMENT PROCESS

Federal and State Regulations

The requirements for the TIP development process are established in federal surface transportation legislation, titled *Fixing America's Surface Transportation Act* (FAST Act). Adopted into law in 2015, the FAST Act maintains guidelines for TIP development set by preceding transportation legislation and requires that a TIP:

• Include any projects with federal funding under 23 U.S.C. (Federal Highway Administration) and 49 U.S.C. Chapter 53 (Federal Transit Administration) and projects that are regionally significant. SRTC's definition for regionally significant can be found in the TIP Guidebook at www.srtc.org/tip.html. Only projects that are planning to obligate (meaning a jurisdiction has been approved to spend) funds within the next four years are required to be included in the TIP. If a project has already obligated all funds, the project is not included in the TIP, even if it is not yet completed. Conversely, if a project has federal funds but is not planning to obligate them within the next four years, the project is not included in the TIP;

- Ensure consistency between projects and programs in the TIP and the MTP;
- Demonstrate that the projects included in the TIP can be implemented with reasonably available resources;
- Certify that National Highway System (NHS) facilities are in adequate condition;
- Provide reasonable opportunity for public comment, including a formal public meeting and posting the document online; and
- Be developed at least every four years by the MPO in cooperation with the State and any affected public transportation operators.

Beyond these federal regulations, Washington State law requires that a regional TIP must be updated at least every two years and include a program of projects for at least 6 years (RCW 47.80.023(5)), which is why two additional years (2026 and 2027) have been included. SRTC's practice is to update the TIP annually. The TIP is also regularly amended or corrected for accuracy through a formal process. The amendment and modification schedule can be found in Appendix B.

Project Selection Process

SRTC is responsible for selecting projects for the federal Surface Transportation Block Grant (STBG) Program, STBG Set-Aside and Congestion Mitigation and Air Quality program (CMAQ) funds for inclusion in the TIP. These projects are incorporated into the TIP along with other federally funded or regionally significant projects. SRTC has also responsible for selecting project for federal Highway Infrastructure Program (HIP) funds when distributed from the state to SRTC.

Projects are selected by the SRTC Board of Directors though a competitive process designed to ensure that projects are prioritized consistent with the Guiding Principles which were used to develop the MTP.

Public Participation Plan

The public involvement process for the TIP is consistent with SRTC's Public Participation Plan (PPP). Participating agencies and the public are provided an opportunity to comment on the TIP several ways. Throughout the year, the public is invited to attend SRTC advisory committee meetings to discuss project selection, TIP amendments, and the 2023-2026 TIP development. Documentation from the meetings is posted on the posted to the SRTC website and social media platforms, an SRTC website, www.srtc.org.

To review and discuss the 2023-2026 TIP, a hybrid in-person/online public meeting will be held on 09/21/2022 from 12:00pm to 1:00pm. Staff from the City of Spokane, City of Spokane Valley, and Spokane County will present project information and answered questions about projects in the program. The public meeting will be recorded and posted to YouTube for additional viewing opportunities throughout the public comment period.

A notice of the meeting was advertised in the Spokesman-Review, sent directly to an email distribution list of interested parties. The draft TIP document was posted to SRTC's website and shared to social media platforms to provide an opportunity for public review of the document.

The 30-day public comment period for the document began 09/01/22 and concluded 10/1/2022. Public comments received during the comment period will be compiled and addressed in Appendix G. SRTC also coordinated with member jurisdictions for responses.

Coordination with Neighboring Agencies

SRTC coordinates with Kootenai County MPO (KMPO). The draft TIP was provided to KMPO for review during the public comment period.

SRTC coordinates with the Spokane Tribe of Indians, the Kalispel Tribe of Indians, and the Northeast Washington Regional Transportation Planning Organization to incorporate tribal transportation projects into the TIP as applicable. Reservation lands for both tribes fall within the Northeast Washington RTPO's planning area, however, each tribe also has tribal trust lands within SRTC's planning area. A process was developed to improve communication between all partners in the TIP process and to clarify which MPO/RTPO's TIP the Tribes would use for different project types. The draft TIP was provided to the Spokane Tribe and the Kalispel Tribe for input and comments.

TIP CONSISTENCY DETERMINATIONS

Metropolitan Transportation Plan

The current MTP, Horizon 2045 was approved by the SRTC Board of Directors in December 2021. This plan identifies and recommends highway, transit, non-motorized, and other transportation related improvements that will help to meet future demand. Projects included in the TIP are drawn directly from the strategies and projects in Horizon 2045. The next scheduled update of the MTP will be in 2025.

Congestion Management Process

In 2014 the SRTC Board of Directors approved a Congestion Management Process (CMP) which is a regional approach for managing traffic congestion that includes information on the performance of the transportation system. The CMP also looks at strategies for managing congestion to meet state and local needs. SRTC implements this process, with the help of other area jurisdictions, as dictated by federal requirements. The CMP guides the agency's investments that address congestion.

The CMP has special significance in metropolitan areas with a population of 200,000 or more that are designated by the Environmental Protection Agency (EPA) as an air quality non-attainment or maintenance area. Transportation projects designed to increase the capacity of single occupancy vehicles (SOVs) (i.e., widening roadways or building new facilities) may not receive federal funding unless the project has been identified in the CMP. Additionally, lower-cost travel demand and operational improvement methods must be considered first before a roadway's capacity can be increased.

The CMP identifies sixteen congested corridors whose performance is monitored annually. Congestion management strategies were recommended for eight "Tier 1" corridors, with that have regional importance and significant congestion. Strategies were tailored for each corridor individually and include a variety of travel demand, operational, freight and capacity solutions. The focus is to start with lower-cost strategies first.

Projects that include CMP strategies score higher in SRTC's competitive Call for Projects. Congestion- related criteria was added to the TIP call for projects application and scoring process after development of the CMP.

For all regionally significant roadway projects that significantly increase SOV capacity, a CMP/ Transportation Improvement Program (TIP) Compliance Process ensures proper process before a project appears in the TIP.

This process may require a Roadway Capacity Justification Report to explain to the SRTC Board the need for additional capacity and what least-cost planning efforts were considered before concluding that new lanes are necessary. This process is not limited to CMP Corridor projects; it pertains to all regionally significant projects in the TIP.

Air Quality Conformity

On 08/29/2005 the Environmental Protection Agency (EPA) re-designated the Spokane area from nonattainment to attainment for carbon monoxide (CO) with an approved maintenance plan (70 FR 37269). On 08/30/2005, EPA re-designated the Spokane area from nonattainment to attainment for particulate matter-10 (PM₁₀) with an approved Limited Maintenance Plan (LMP) (70 FR 38029).

On 05/12/2016 the EPA approved the Second 10-year LMP for PM₁₀ effective until 8/30/25. The Second 10-year LMP for CO was approved August 15, 2016, effective until 8/29/25. These LMPs demonstrate the minimal risk that PM₁₀ and CO from motor vehicles would contribute to a PM₁₀ or CO violation. For this reason, no motor vehicle emission budget (MVEB) or paved road dust budget is established. While an area with an LMP does not need to do a regional emissions analysis, it still retains other conformity requirements as detailed in 40 CFR 93.109, such as consultation (40 CFR 93.112), timely implementation of transportation control measures (40 CFR 93.113), and project level analysis (40 CFR 93.116).

LMPs do not establish a MVEB because growth would need to exceed reasonable expectations to create a violation of the national ambient air quality standards (40 CFR 93.109(c)). As published in the PM₁₀ LMP Qualification Assessment, VMT was projected to grow by 36% over the ten-year period of 2000 to 2010, or 3.1% annually. Since the actual VMT annual growth rate of 1% included in Horizon 2040 is less than the 3.1% rate assumed in the PM₁₀ LMP, Horizon 2040 and the 2022-2025 TIP conform to the PM₁₀ LMP. Through the TIP consultation process, it was agreed that the same VMT growth rate analysis is used to evaluate conformity with CO. The projects in the 2022-2025 TIP are consistent with Horizon 2040, which meets the conformity requirements of the Federal Clean Air Act Amendments of 1990 and the Washington Clean Air Act.

Transportation Control Measures (TCMs)

Per 40 CFR 93.101, a transportation control measure is any measure that is specifically identified and committed to in an implementation plan to reduce emissions or concentration of air pollutant from transportation sources by reducing vehicles use, changing traffic flow or congested conditions. Per the State Implementation Plan and LMP, there are no CO transportation control measures. PM₁₀ control measures include the Washington State (RCW 70.94, WAC 173-433) and Spokane Regional Clean Air Agency's (Regulations 6.05, 6.14, 6.15) programs to reduce residential wood smoke, paving critical unpaved roads, and street sweeping programs.

Contingency Measures

Contingency measures achieve emission reductions for a specified period. The mandatory vehicle inspection and maintenance (I&M) program was the predominant CO transportation contingency measure for Spokane County. The program ended on 12/31/2019 but may be reinstated if necessary. After the first CO maintenance demonstration included dropping the winter oxygenated fuel requirement, the Spokane Clean Air Board repealed Article VI, Section 6.16 Motor Fuel Specifications for Oxygenated Gasoline. The oxygenated fuel requirement will remain as a contingency measure and can be re-adopted if necessary.

Safe and Complete Streets Policy

After SRTC Board approval, the Safe and Complete Streets Policy went into effect in January 2013. The primary purpose of the policy is to ensure that the safety and convenience of all transportation system users (pedestrians, bicyclists, transit users, motorists, freight providers and emergency responders) are considered during the planning and programming of projects. The SRTC Safe and Complete Streets Policy and checklist applies to all roadway construction and all phases roadway reconstruction projects that are required to be included in the TIP.

Performance Management

WSDOT and SRTC are currently in full compliance of setting performance targets as originally defined in Moving Ahead for Progress in the 21st Century (MAP-21). SRTC has agreed to plan and program projects so that they contribute to all statewide and public transit targets as reported to the Federal Highway Administration and Federal Transit Administration. Detailed performance targets can be found in Appendix C.

SRTC conducted a call for preservation projects in 2021 and awarded \$4.64 million to improving NHS pavement condition around the Spokane region and those projects are newly included in this TIP. Additionally, in 2021 the statewide NHS pavement preservation program awarded \$12.4 million to local agencies to improve NHS pavement condition and \$7.7 million to improve local bridge condition in the region. Additional in this TIP, projects awarded through CMAQ funding address removing CO and PM10 emissions. Other investments that lead to improved performance in the TIP are funded using state Highway Safety Improvement Program funds to reduce crash frequency and severity.

Federal Highway Administration Performance Targets

Title 23 (Federal Highways) USC 150 states that performance management provides a means to the most efficient investment of federal transportation funds by (1) focusing on national transportation goals, and (2) improving project decision making through performance-based planning and programming. WSDOT and MPOs have been coordinating since 2015 to meet the requirements in the following national goal areas: Safety, Infrastructure Condition, Congestion, System Reliability, Freight Movement and Environmental Sustainability.

Safety Targets

The stated goal for Safety: to achieve a significant reduction in traffic fatalities and serious injuries on all public roads. Pursuant to these national goals, State Departments of Transportation (DOTs) are required by the federal Highway Safety Improvement Program regulations under 23 CFR 924 to set five annual safety performance targets. These five required performance targets use five year rolling averages for (1) number of fatalities, (2) rate of fatalities per 100 million VMT, (3) number of serious injuries, (4) rate of serious injuries per 100 million VMT, and (5) number of non-motorized fatalities and non-motorized serious injuries. These targets are required for all public roads regardless of ownership or functional class.

MPOs are also required to establish the same five target areas with the state DOT for all public roads within 180 days of submittal of the state established targets. MPOs can agree to either support the State DOT targets or establish separate MPO targets specific to the metropolitan planning area.

In 2019, WSDOT coordinated with MPOs through an established MAP-21 collaboration process. SRTC supports programs and projects that contribute to statewide annual safety targets set by WSDOT. Annual 2022 safety

targets are currently in development and not available at the time of this report. Safety targets are reported to WSDOT and the Federal Highway Administration as part of WSDOT's Highway Safety Improvement Program annual submittal.

Pavement and Bridge Targets

RCW 47.05 and WSDOT's Highway System Plan set the direction for infrastructure condition management in Washington State, which is to preserve payments and bridges at the lowest life cycle cost. The lowest life cycle strategy for any pavement or bridge is the strategy that maintains acceptable condition at the lowest annualized cost over the life of the asset. WSDOT has demonstrated this by taking a preservation first approach to pavement and bridge management over several decades.

SRTC agrees to plan and program projects to work towards and achieve Washington pavement and bridge condition targets for infrastructure condition under 23 CFR 490. As required under 23 CFR 515, the specific strategies for pavement and bridge preservation are documented in WSDOT's <u>Transportation Asset Management Plan</u>, certified by FHWA in May 2018.

Local agencies manage approximately 31% of the non-Interstate National Highway System (NHS) in Washington State. Using the Target Setting Framework, WSDOT worked with SRTC and other MPOs to establish performance measures and communicate pavement and bridge management practices, as well as what these practices mean in the context of the NHS. WSDOT regularly release information about the annual average state facility needs for pavements and bridges within each MPO boundary.

System Performance, Freight, and CMAQ Targets

In 2018, Washington MPOs and WSDOT set, adopted, and reported statewide targets for the Highway System Performance, Freight, and Congestion Mitigation and Emissions performance measures to FHWA. SRTC agrees to plan and program projects to work towards and achieve Washington Highway System Performance, Freight, and Congestion Mitigation and Emissions Performance under 23 CFR 490. Washington State MPOs and WSDOT continue to improve the planning and programming process to more fully align funding decisions with performance targets.

In Washington State, many of the projects selected to address mobility are prioritized through the legislative process. For this reason, it is essential that WSDOT, MPOs, regional transportation planning organizations (RTPOs), and local agencies coordinate their transportation planning efforts to develop transportation priorities that contribute towards performance targets and can be shared with lawmakers.

One such way WSDOT and its partner MPOs and RTPOs are working to make performance-supporting projects and programs clear to the legislature is through the Plan Alignment Work Group. A major focus of this group is to increase the consistency between regional plans and WSDOT's statewide plans. This includes sharing and collaboratively perfecting the data and information necessary to identify a comprehensive list of financial forecasts, maintenance needs, and project priorities related to the state system within MPOs and RTPOs.

Another way WSDOT is partnering with SRTC is by sharing performance data and analytics through the Regional Integrated Transportation Information System (RITIS) tool. The state's financial participation makes this tool available for WSDOT and SRTC to use the system in evaluating regional targets and to assist in our SRTC decision making processes.

Over the coming years WSDOT and its partners will further align planning and programming areas with performance. All are committed to developing practical approaches to work towards our regional and statewide performance targets.

Federal Transit Administration Performance Targets

Under Title 49 CFR Part 625 and 630 under Transit Asset Management (TAM) requirements, public transit providers must set State of Good Repair performance targets for their assets.

Public Transit Targets

Since Spokane Transit Authority (STA) is the only Tier 1 public transportation provider currently required to report TAM targets, SRTC adopted these targets on 06/14/2018 (See Appendix C). Per federal requirements, anytime a public transit provider adopts new TAM targets, SRTC has 180 days to review and adopt TAM performance targets and bring them into the regional performance management efforts. Additionally, the SRTC Board adopted STA's Public Transit Safety Targets on 03/11/2021.

2022-2025 TIP ACCOMPLISHMENTS

Status of Major Projects

Pursuant to federal regulation 23 CFR.326 n (2), a listing of major projects from the preceding TIP that have been implemented, or obligated funding, is provided below.

Table 1. Completed Projects (fully obligated)

| Agency | Project Title | STIP ID |
|---------------------------|---|-----------|
| Airway Heights | Highway 2 Shared Use Path Gap Project | WA-11818 |
| Cheney | Washington Street Preservation | WA-13828 |
| Deer Park | E Crawford Preservation | WA-13966 |
| Spokane | Centennial Trail Summit Gap | WA-09829 |
| Spokane County | 2021 NE County Rumble Str. | WA-14087 |
| Spokane County | Bigelow Gulch/forker Connection | CRP-2620 |
| Spokane County | Brooks Rd | WA-06998 |
| Spokane County | Commute Trip Reduction 2022 | WA-11857 |
| Spokane County | Commute Trip Reductio 2023 | WA-11858 |
| Spokane County | Country Homes Blvd Preservation | WA-13972 |
| Spokane County | Elk Chattaroy Preservation | WA-13970 |

| | | |

Status of All Active Projects

SRTC develops an annual list of all projects that have obligated federal funds in the preceding year (§450.332). For the 2022 program year, the annual listing will be published no later than March 31, 2023. The listing will be made available on the SRTC website, www.srtc.org, and presented to the SRTC Board and both advisory committees.

FINANCIAL PLAN

A vital part of the Transportation Improvement Program (TIP) is the financial plan that demonstrates that the resources necessary to complete the projects in the TIP are secured or reasonably available.

Federal rules require that TIPs prepared by MPOs include a financial plan that demonstrates that the program is financially realistic for each year of the TIP. SRTC, STA, and WSDOT in coordination develop funding estimates that are reasonably expected to be available to pay for projects and programs included in the TIP. These estimates are used to ensure that projects in the TIP can be funded by the anticipated revenue stream. This section contains the financial plan, including a description of assumptions and revenue sources available for transportation projects in the TIP.

The TIP is financially constrained, meaning that the amount of funding programmed does not exceed the amount of funding estimated to be available. All projects programmed in the TIP are considered to have a reasonable expectation of being fully funded, even if funding is outside of the four-year TIP program period.

Assumptions

Projects programmed in the TIP reflect costs in year of expenditure dollars. The financial plan assumes that 100 percent of federal allocations will be available. For funding sources with a regional allocation (Section 5307/5310/5339, CMAQ, STBG, STBG Set-Aside), the number of dollars available is based on the previous year's allocations or estimates. For State or Federal funding sources, the regional total is assumed to be equal to the total of projects selected by the Washington State Department of Transportation or by federal agencies.

Operation and Maintenance Cost

SRTC monitors funds that are used to adequately maintain, preserve, and operate the transportation system already in place. On average, local agencies will spend \$25 million annually for the entire road system in Spokane County. These costs will likely increase over time as the transportation system ages and grows. These operation and maintenance costs are assumed to be covered primarily through available local resources.

STA spends approximately \$82 million annually to operate and maintain fixed route, vanpool and paratransit services. STA saw a 2.1% increase in its operating expenses between 2019 and 2020 mainly due to additional service and expenses related to the 10-year Moving Forward Plan. STA decreased its 2021 operating budget by 2.2% over the 2020 budget, in anticipation of financial and ridership challenges presented by the COVID-19 pandemic.

PROJECT SELECTION

In order to meet federal requirements, all federal projects programmed in the 2023-2026 TIP are considered selected projects. However, due to federal fiscal constraints in any one year, the statewide management of funds on a first come basis, SRTC cannot guarantee a project will be constructed or implemented in the year it is programmed.

FINANCIAL FEASIBILITY SUMMARY

The TIP for Spokane County demonstrates that it is a financially realistic program, in that projected revenue by program is adequate to meet the estimated cost of programmed projects for each year. A summary of financial feasibility is presented in Chart 1 (page 18). For a full list of local, state, and federal revenue sources and their abbreviations, please see Appendix D.

Spokane Regional Transportation Council (SRTC)

2023–26 Regional TIP (RTIP) Fiscal Constraint Summary

| Fund Source | Fund Distribution | Fund Type | Year | Starting Balance (carryover) | Annual Allocation | Available Revenue | Total Amount Programmed | Ending Balance (carryover) |

SPOKANE TRANSIT AUTHORITY FINANCIAL CAPABITY

FTA, in its 2020 Triennial Review, found STA to be in compliance with financial capacity requirements. In accordance with Federal Transit Administration (FTA) Circular 7008.1A, 01/30/2002, it has been determined that STA has the financial capacity to carry out the capital, operating, planning and maintenance activities listed in the TIP.

Financial capacity includes two measures: (1) financial condition and (2) financial capability which includes the ability to fund current capital projects in addition to ongoing operations from projected revenues.

Financial Condition

The positive finding on STA's financial condition is based on the Washington State Auditor's office report on STA's financial statements, containing an unqualified opinion for 2021. STA's adopted 2022 budget further illustrates STA's positive financial condition. STA's policy is to operate on a pay-as-you go basis; the agency will not incur debt or agree to other financial commitments beyond the balance of current or projected revenue. It also has a designated reserve equal to 15% of estimated annual operating expenses, a risk reserve of \$5.5 million, and a right of way acquisition reserve of \$4.95 million for total reserves in 2022 of \$24.9 million.

Sales tax is STA's primary dedicated source of local revenue. In November 2016, voters approved a 2/10% increase in STA's sales tax rate with 1/10% implemented in April 2017 and another 1/10% implemented in April 2019. Sales tax revenues can be unpredictable. STA has 1/10% of sales tax capacity remaining. Voter approval is required to implement any of this additional capacity.

Financial Capability

STA has the financial capability to meet future annual operating, maintenance and capital costs. Future financial capability projections were developed for Horizon 2040. STA continues to update their projections for sales tax revenue and operating costs, but for consistency with the current MTP, the following assumptions were used:

- 1. Revenue projections for 2020-2040 are based on the budget assumptions adopted by the STA Board
- 2. Section 5307 federal preventive maintenance funding will be maximized throughout the projection period.
- 3. A two-tiered fare increase was implemented in July 2017 with the second phase implemented in July 2018.
- 4. The Capital Program will be funded as contained in the Transit Development Plan for 2022 through 2027.
- 5. STA currently uses 8/10ths of 1% of the local sales tax. The statutory maximum rate of sales tax collection for public transportation is 9/10ths of 1% (RCW 82.14.045).

STA's 2021 budget assumed sales tax revenue would experience a significant decrease over what was collected in 2020 as the COVID-19 pandemic impacted the regional economy. Fare revenue was projected to improve slightly over 2020 which suffered a steep decline as COVID-19 hampered ridership in response to state of emergency declarations. It is unclear when ridership will recover to pre-pandemic ridership levels.

2023-2026 TIP PROJECTS

OVERVIEW

The remainder of this document details the 2023-2026 projects that are regionally significant and/or are federally funded.

New Projects

There are 87 projects programmed in the TIP for the years 2023-2026. The majority of these are active projects that were included in the previous TIP. 18 projects are new to the 2023-2026 TIP and are listed in Table 2 below.

Table 2. New Projects in the 2023-2026 TIP

| Agency | Project Name | TIP ID Number |
|-----------------|---|---------------|
| Airway Heights | SR2 Multi-Modal and Pedestrian Enhancements | WA-14698 |
| Deer Park | N Colville Reconstruction | WA-14691 |
| Medical Lake | Lake St ADA Upgrades | WA-14664 |
| Spokane County | Commute Trip Reduction Program 2024-2026 | WA-14682 |
| Spokane County | Harvard Rd Reconstruction - Phase 2 | WA-14683 |
| Spokane County | Argonne Road and Upriver Drive Intersection Improvement | C3313 |
| Spokane County | Cascade Way Reconstruction | 3314 |
| Spokane Valley | Trent Ave Access Control Safety Improvements | WA-14755 |
| Spokane Valley | S. Barker Rd. (Appleway-Sprague) | WA-14652 |
| Spokane Valley | 2022 Citywide Signal Backplates | WA-14756 |
| Spokane Valley | Argonne I-90 Bridge (PE Only) | WA-14651 |
| Spokane Transit | Division St BRT Project Development | WA-14717 |
| Spokane Transit | I90/Valley HPT Line Park & Ride Construction | WA-14718 |
| Spokane Transit | Division Line: Division BRT Construction and Implementation | WA-14727 |
| WSDOT | I-90/Lincoln, Brown WB Ramps - Bridge Deck Rehab/Expansion Joint Repair | 609048P32 |
| WSDOT | I-90/Latah Creek Crossing - Bridge Rehab | 609047B32 |
| WSDOT | US 2/Sunset Airport I/C - Bridge Deck Rehab/Expansion Joint Repair | 600282A32 |
| WSDOT | US 2/Deep Ck Crossing - Bridge Repair | 600227K32 |

Projects by Type

The projects in the TIP have been classified by project type to represent the number of, and dollars associated with, different types of projects (Table 3). Roadway projects are classified as Preservation, Reconstruction, Roadway, Capital, or Bridge. Safety projects may be roadway, bicycle & pedestrian, or transit. The classification for each project is provided in the program summary (pages 22-23).

Table 3. 2023-2026 Projects by Project Type

| Project Type | Number of Projects | % of Projects | Programmed Amount | % of Program |
|--------------------------|-----------------------|---------------|----------------------|--------------|
| Bicycle & Pedestrian | 11 | 13% | 28,027,428 | 3% |
| Bridge | 15 | 17% | 38,822,446 | 4% |
| High Performance Transit | 3 | 3% | 199,401,000 | 20% |
| Planning | 3 | 3% | 1,734,105 | 0% |
| Preservation | 9 | 10% | 68,445,706 | 7% |
| Rail/Highway Crossing | 1 | 1% | 35,497,871 | 3% |
| Reconstruction | 11 | 13% | 33,225,275 | 3% |
| Roadway Capital* | 4 | 5% | 17,799,654 | 2% |
| Roadway Capital – NSC** | 3 | 3% | 502,397,895 | 49% |
| Safety | 15 | 17% | 14,400,005 | 1% |
| Transit | 3 | 3% | 70,306,331 | 7% |
| TDM | 1 | 1% | 1,296,632 | 0% |
| TSMO | 8 | 9% | 6,177,818 | 1% |
| TOTAL | 87 | 100% | 1,017,532,166 | 100% |

^{*} Category includes constructing new roadways, reconstruction projects that add additional capacity, and paving dirt roads.

DOCUMENT ORGANIZATION

Program Summary

The list of planned projects for 2023-2026 is detailed in the Program Summary, starting on page 22. The Program Summary lists the project name, TIP identifier, project type, total cost, and funding information. The total project cost is the cost of the project from all sources, including funds that have already obligated (referred to as prior funding).

Detailed Project Information

The official TIP information for each project, submitted to WSDOT by the project sponsor, is included in the Washington State TIP (STIP) project pages, see Appendix E.

^{**} For informational purposes, and due to the significant cost of the project, the North Spokane Corridor (NSC) project is shown separately from the New Roadway category.

APPENDIX A SRTC INFORMATION

Spokane Regional Transportation Council (SRTC) is an intergovernmental agency made up of local jurisdictions within Spokane County. The Council was founded in 1967 as both the federally mandated Metropolitan Planning Organization and state mandated Regional Transportation Planning Organization.

Member Jurisdictions, Tribes, and Agencies

City of Airway Heights City of Spokane Valley Town of Latah City of Cheney Kalispel Tribe of Indians Town of Spangle City of Deer Park Spokane County Town of Rockford **Spokane Transit Authority** Town of Waverly City of Liberty Lake Spokane Tribe of Indians City of Medial Lake

WSDOT-Eastern Region

Town of Fairfield City of Millwood **WA State Transportation Commission**

City of Spokane

2022 SRTC Board of Directors

Jurisdiction Name of Representative City of Cheney Paul Schmidt, (Chair)

City of Spokane Betsy Wilkerson, Council Member (Vice Chair)

City of Airway Heights Jennifer Morton, Council Member City of Deer Park Dee Cragun, Council Member

City of Medical Lake **Mayor Terri Cooper** City of Millwood **Mayor Kevin Freeman** City of Liberty Lake **Mayor Cris Kaminskas**

City of Spokane Zack Zappone, Council Member

City of Spokane Valley **Mayor Pam Haley**

City of Spokane Valley Rod Higgins, Council Member

Kalispel Tribe of Indians **Sev Jones** Major Employer Representative **Doug Yost** Rail/Freight Representative **Matt Ewers**

Small Towns Representative Micki Harnois, Town of Rockford Council Member

Al French, Commissioner **Spokane County Spokane County** Mary Kuney, Commissioner

Spokane Transit Authority E Susan Meyer, CEO

Spokane Tribe of Indians Tiger Peone, Council Member

WSDOT-Eastern Region Mike Gribner, Regional Administrator

WA State Transportation Commission Kelly Fukai, Commissioner

Transp. Advisory Committee Chair **Rhonda Young**

Transp. Technical Committee Chair Inga Note, City of Spokane

APPENDIX B

AMENDMENTS AND ADMINISTRATIVE MODIFICATIONS

AMENDMENTS

"Amendment" means a major change to a project included in the TIP, including the additional or deletion of a project or a major change in project cost, project/project phase initiation dates, or a major change in design concept or design scope (e.g. changing project termini or the number of through traffic lanes), (23 CFR 450.104). Examples of an amendment would be:

- Adding a new project
- Deleting a project
- Changes to a project's total programmed amount greater than 30% (or any amount greater than \$3 million). This includes adding or subtracting funds from currently programmed phases.
- Major scope changes
- Changes to a project that affects transportation conformity with air quality plans
- Adding a future phase of a project
- Adding federal dollars to a project currently in the TIP that does not have federal funds (federalizing a project)

ADMINISTRATIVE MODIFICATION

"Administrative Modification" means a minor revision to a project in the TIP, including minor changes to project/project phase costs, minor changes to funding sources of previously included projects, and minor changes to project/project phase initiation dates. Examples of an administrative modification would be:

- Revisions to lead agency
- Adding a prior phase of a project previously authorized
- Changes to a project's total programmed amount less than 30%. This includes adding or subtracting funds from currently programmed phases
- Minor scope changes
- Minor changes or corrections in project information, such as: environmental type, right-of-way required, improvement type, project limits, functional classification, typographical errors, transposed numbers, etc.
- Moving a project within the first four years of the TIP
- Changes in a project's federal fund source (ex. IM to NHS)
- Any and/or all federal funds currently programmed in the TIP for a project without consideration of the phase split
- All adjustments in a project's funding authorization for award of contract

APPENDIX C

PERFORMANCE MEASURES AND STATEWIDE TARGETS

MPO Responsibilities Federal 23 USC Part 134 directs MPOs to take a performance-based approach to transportation planning. Specifically, as the MPO for the Spokane Region, Spokane Regional Transportation Council (SRTC) is required to establish performance targets under the performance measure framework as laid out in federal rule 23 CFR Part 49.105. The framework gives flexibility to SRTC to either support Washington State Department of Transportation's (WSDOT) statewide performance measure targets, or to establish targets for the MPO boundary, depending on the performance measure, 180 days after WSDOT or the public provider of transportation in our region (Intercity Transit) develops performance measure targets.

If an MPO supports a WSDOT target, they also must agree to plan and program projects so that they contribute toward the accomplishment of the relevant WSDOT target.

Since 2018 SRTC has supported WSDOT performance measure targets relating to the following subject areas.

- Safety (supported WSDOT target)
- Pavement & bridge (supported WSDOT target)
- System performance/congestion (supported WSDOT target)
- Freight movement (supported WSDOT target)
- Congestion mitigation & air quality (supported WSDOT target)
- Transit asset management (adopted Target developed by Spokane Transit)
- Transit safety performance (adopted Target developed by Spokane Transit)

Performance Measure 1: Safety Targets

| Measure (5-year Averages) | 2018 Baseline Statewide 5-year rolling avg. | Statewide Targets for 2022 |
|--|--|----------------------------|
| Number of Fatalities | 531.8 | 437.3 |
| Rate of Fatalities | 0.879 | 0.73 |
| Number of Serious Injuries | 2154.6 | 1819.0 |
| Rate of Serious Injuries | 3.562 | 3.042 |
| Number of Fatalities & Serious Injuries for Non-Motorized transportation | 559.8 | 464.6 |

^{*}The SRTC Board supported using statewide safety targets on 03/10/2022

Performance Measure 2: Bridge and Pavement Targets

| Bridge Condition-Statewide | Baseline Data | 2-year Target (2020) | 4-year Target (2022) |
|---|---------------|-------------------------|-------------------------|
| Percent of NHS Bridges in good condition | | | |
| (weighted by deck area) | 32.8% | 30% | 30% or more |
| Percent of NHS Bridges in poor condition (weighted by deck area) *Supported by the SRTC Board on November 8, 2018 | 7.8% | 10% | 10% or less |
| Pavement Condition-Statewide | Baseline Data | 2-year Target (2020) | 4-year Target (2022) |
| Percent of Interstate pavement | | | |
| on the NHS in good condition | 32.5% | N/A | 30% or more |
| Percent of Interstate pavement | | | |
| on the NHS in poor condition | 3.6% | N/A | 4% or less |
| Percent of Non-Interstate pavement | | | |
| on the NHS in good condition | 18% | 45% | 18% or more |
| Percent of Non-Interstate pavement | | | |
| on the NHS in poor condition | 5% | 21% | 5% or less |
| *Supported by the SRTC Board on November 8, 2018 | | | |

Performance Measure 3: System Performance, Freight and CMAQ Targets

| Highway System Performance (congestion) | Baseline Data | 2-year Target (2020) | 4-year Target (2022) |
|---|---------------|-------------------------|-------------------------|
| Percent of person-miles traveled on the | | | |
| Interstate System that are reliable | 73% | 70% | 68% or more |
| Percent of person-miles traveled on the | | | |
| Non-Interstate System that are reliable | 77% | N/A | 61% |
| Truck Travel Time Reliability (TTTR) index | 1.63 | 1.70 | 1.75 |
| | | | |
| Carbon Monoxide (CO kg/day) | 313.160 | 309.000 | 309.06 |
| Particulate Matter < 10 microns PM10 (kg/day) | 435.690 | 0.305 | 224 |

^{*}Supported by the SRTC Board on November 8, 2018

Public Transit Safety Performance

| Asset Category | Asset Class | Baseline | STA Target & | |
|----------------|------------------------|---|--|--|
| Asset Category | Asset Class | Performance | Proposed Regional Target | |

Link to 2022 STA Transit Asset Management Plan: Public Transit Asset Management Targets

Public Transit Safety Performance

MPO's are required to adopt public transit safety targets found in the Public Transportation Agency Safety Plan (PTASP) of the public transit agencies within their boundaries, as required by 49 CFR 473. Spokane Transit Authority (STA) is the only public transportation provider required to report these targets to SRTC at this time. SRTC and STA are required to coordinate on these targets and the target-setting process. Per federal requirements, anytime a public transit provider adopts new targets, SRTC has 180 days to review and adopt performance targets and bring them into the regional performance management efforts. SRTC agreed to support safety targets developed by Spokane Transit Authority though a Board motion on 03/11/2021 the SRTC Board adopted STA PTSP as part of the SRTC TIP amendment.

Safety Goals, Objectives, and Performance Targets

Spokane Transit's first step in Safety Assurance is establishing Safety Objectives and Performance Targets to meet the Agency's safety goals. Key Performance Indicators (KPIs) are established that indicate whether the Agency is achieving its safety objectives and performance targets.

Safety Goal 1 - Safety Management Systems to Reduce Casualties and Occurrences

Using a safety management systems framework to identify safety hazards, mitigate risk, and reduce casualties and occurrences results from transit operations to meet or exceed the acceptable level of safety performance.

FIXED ROUTE PREVENTABLE VEHICLE ACCIDENT FREQUENCY RATE

Objective Metrics (KKPI) **Baseline Target** Number of preventable 0.6 0.08 or less Reduce the frequency of

preventable vehicle collisions events per 10,000 miles

PARATRANSIT PREVENTABLE VEHICLE ACCIDENT FREQUENCY RATE

Objective Metrics (KPIs) **Baseline Target** Reduce the frequency of Number of preventable 0.13 0.1 or less

preventable vehicle collisions events per 10,000 miles

FIXED ROUTE PREVENTABLE PASSENGER INJURY ACCIDENTS

Metrics (KPIs) **Baseline Target** Reduce the frequency of Number of preventable 4 0

preventable passenger passenger injuries per year

injuries

PARATRANSIT PREVENTABLE PASSENGER INJURY ACCIDENTS

Objective Metrics (KPIs) Baseline **Target** Reduce the frequency of Number of preventable 4 0

preventable passenger passenger injuries per year

injuries

FIXED ROUTE SAFETY EVENTS

Objective Metrics (KPIs) **Baseline Target**

Reduce the number of events Total number of events per 316 310

per year year

PARATRANSIT SAFETY EVENTS

Objective Metrics (KPIs) **Baseline Target** 50

Reduce the number of safety Number of safety events per 54

events per year year

EMPLOYEE INJURY ACCIDENTS

Objective Metrics (KPIs) **Baseline Target**

Reduce the frequency of Number of employee injuries .05 .07

employee injuries per 1000 hours

EMPLOYEE INJURY SEVERITY

Objective Metrics (KPIs) **Baseline Target** .03 .04

Reduce employee time loss Number of days lost per

due to injury or illness 1,000 hours

FACILITY SAFETY INSPECTIONS

Objective Metrics (KPIs) Baseline Target

Increase the assessment of Number of facility safety 1 per quarter Meet the baseline facilities, equipment, and procedures to identify and completed quarterly per

mitigate any potential safety year

risks

Safety Goal 2 - Safety Management Systems to Foster a Robust Safety Culture

Foster agency-wide support for transit safety by establishing a culture where managers are held accountable for safety and everyone in the organization takes an active role in securing transit safety, cultivate a safety culture in which employees are comfortable and encouraged to bring safety concerns to the attention of agency leadership.

SAFETY TRAINING

| Objective | Metrics (KPIs) | Baseline | Target |
|-------------------------------|---|----------------------|-----------------------|
| Increase attendance at | Percent of employees who | Establishing in 2020 | Safety Committee |
| monthly safety meetings | participate in the monthly safety meetings | | Meeting Target = 100% |
| Annual Advanced Training | Percentage of employees | 100% | 100% |
| completed by all Fixed Route, | who complete Advanced | | |
| Paratransit, and Maintenance | training | | |

Safety Goal 3 – Safety Management Systems to Foster a Robust Safety Culture

STA will provide safe and efficient transit operations by ensuring all vehicles, equipment, and facilities are regularly inspected, maintained, and serviced as required.

FIXED ROUTE ROAD CALLS

ObjectiveMetrics (KPIs)BaselineTargetReduce the number of FixedNumber of miles6,722 miles7,500 milesRoute Road Callsbetween road calls

APPENDIX D

FEDERAL, STATE AND LOCAL REVENUES

FEDERAL REVENUES

The current federal surface transportation program, *Fixing America's Surface Transportation (FAST) Act* was signed 12/04/2015 and includes the following federal programs:

Congestion Mitigation and Air Quality (CMAQ): The CMAQ category addresses congestion mitigation and air quality improvement in non-attainment and/or maintenance areas. Funds are distributed to non-attainment and maintenance areas based on their population and the severity of air quality non-attainment. The MPO prioritizes and programs projects for funding.

Highway Infrastructure Program (HIP): Provides support for road and bridge projects and for the elimination of hazards and the installation of protective devices at railway-highway crossings. Eligible activities include only construction of highways, bridges and tunnels per 23 USC 133 (b)(1)(A) and for the elimination of hazards and the installation of protective devices at railway-highway crossings. Construction includes design and right of way that directly relates to the construction of these projects (23 USC 101(a)(4)). HIP funds are not eligible to be utilized on: Rural minor collectors or local access, transportation alternatives, ferries, transit, etc.; nor transportation planning and studies.

National Highway Performance Program (NHPP): Provides support for the condition and performance of the National Highway System (NHS), for the construction of new facilities on the NHS, and to ensure that investments of Federal-aid funds in highway construction are directed to support progress toward the achievement of performance targets established in a State's asset management plan for the NHS. The NHPP provides funding for the following types of projects: construction, reconstruction, resurfacing, restoration, rehabilitation, preservation, or operational improvement of segments of the National Highway System.

Surface Transportation Block Grant (STP): This program provides flexible funding that may be used by WSDOT and localities for projects to preserve and improve the conditions and performance on any Federal-aid highway, bridge and tunnel projects on any public road, pedestrian and bicycle infrastructure, and transit capital projects, including intercity bus terminals. The STP program includes sub-allocated funds based on population and flexible funds for use anywhere. STP funds are divided into the following categories:

- Bridge STP (STP(BR)): Replacement, rehabilitation, preservation, protection of local bridges and tunnels on public roads of all functional classifications. The state prioritizes and programs bridges for funding.
- Regional STP (STP(UL), STP(US), STP(R)): MPOs and county lead agencies are allocated STP funds for prioritization and selection. The allocations are based on population areas as follows: Urbanized areas greater than 200,000; Areas greater than 5,000 but no more than 200,000; Areas of 5,000 or less; and for use anywhere in the state. The MPOs and county lead agency programs projects for funding based upon their established procedures.
- WSDOT's STP (STP): A portion of the STP funds that can be used anywhere, are for state highway system preservation and interstate reconstruction. WSDOT prioritizes and programs these projects.

Surface Transportation Block Grant Set-Aside (formerly TAP): Provides funding for programs and projects defined as transportation alternatives, including on- and off-road pedestrian and bicycle facilities, infrastructure projects for improving non-driver access to public transportation and enhanced mobility, community improvement activities, and

environmental mitigation; recreational trail program projects; safe routes to school projects; and projects for the planning, design or construction of boulevards and other roadways largely in the right-of-way of former Interstate System routes or other divided highways. A set-aside for the Recreational Trails Program is provided. MPOs and RTPOs are allocated TAP funds for prioritization and selection. The allocations are based on population areas as follows: Urbanized areas greater than 200,000; Areas greater than 5,000 but no more than 200,000; Areas of 5,000 or less; and for use anywhere in the state. The MPOs and RTPOs programs projects for funding based upon their established procedures.

• Safe Routes to Schools (TAP(SR)): The planning, design, and construction of infrastructure-related projects on any public road or any bicycle or pedestrian pathway or trail in the vicinity of schools that will substantially improve the ability of students to walk and bicycle to school. Also, may include activities to encourage walking and bicycling to school. The state prioritizes and programs safe routes to school (SR) projects for funding.

Highway Safety Improvement Program (HSIP): In FAST Act the objective of the core safety program continues to achieve a significant reduction in traffic fatalities and serious injuries on all public roads, including non-State-owned public roads and roads on tribal lands. These funds are made available to all state and local agencies and tribal nations within Washington and can be applied to all public roadways. The state prioritizes and programs state and local projects based upon the Strategic Highway Safety plan approved by the Governor in 2006 called Target Zero. This program has a set-aside for the railway/highway crossing program.

Demonstration Projects (DEMO): Demonstration projects are identified through appropriation bills approved by Congress. High Priority Projects (DEMO): The High Priority Projects program provides designated funding for specific projects identified by Congress in 23 U.S.C. 117. The designated funding can only be used for the project as described in the law, [1601(a)].

FTA Section 5307 – Urbanized Area Formula Grants: These funds are apportioned by a formula to each urbanized area, and are available for planning, capital and operating assistance. Where they exist, the transportation management area (TMA) and the designated recipient determine the programming of these funds.

FTA Section 5310 - Enhanced Mobility of Seniors and Individuals with Disabilities: This program is intended to enhance mobility for seniors and persons with disabilities by providing funds for programs to serve the special needs of transit-dependent populations beyond traditional public transportation services and Americans with Disabilities Act (ADA) complementary paratransit services. Projects selected for funding must be included in a locally developed, coordinated Public Transit-Human Service Transportation Plan and included in the RTPO program in their respective area. WSDOT administers these funds through the state consolidated grant program.

FTA Section 5311 – Rural Area Formula Grants: These formula funds are apportioned to each state, and eligible activities include program administration, Rural Transit Assistance Program (RTAP) technical assistance, intercity bus programs, state administration, and both capital and operating assistance. WSDOT administers these funds through a competitive grant program serving the general public in rural areas of the state and programs all Section 5311 projects in a statewide grouping in the STIP.

FTA Section 5339 - Bus and Bus Facilities: Provides capital funding to replace, rehabilitate and purchase buses and related equipment and to construct bus-related facilities. WSDOT administers these funds through the state consolidated grant program.

STATE REVENUES

Transportation Improvement Board (TIB): An independent state agency that provides state funding through a share of the statewide gas tax, for street construction and maintenance to cities and counties.

- Urban Arterial Program (UAP): funds roadway projects that improve safety and mobility.
- Urban Corridor Program (UCP): funds roadway projects with multiple funding partners that expand capacity.
- Sidewalk Program (SP): funds sidewalk projects that improve safety and connectivity.
- Small City Arterial Program (SCAP): funds small city (under 5,000 population) projects that improve safety and roadway conditions.
- Small City Preservation Program (SCPP): funds small city (under 5,000 population) projects for rehabilitation and in some cases partners with WSDOT or county paving projects.

Connecting Washington Account (CWA): 2015 CWA package is a \$16 billion investment over the next 16 years.

County Road Administration Board (CRAB): An independent state agency that provides state funding through a share of the statewide gas tax, for county roadway projects and the county owned ferry system.

- Rural Arterial Program (RAP): funds improvements on the county existing rural arterial road network.
- County Arterial Preservation Program (CAPP): funds pavement preservation projects of a county's existing paved arterial road network.
- The County Ferry Capital Improvement Program (CFCIP): offers financial assistance for major capital improvements to the four county-operated ferry systems.

Freight Mobility Strategic Investment Board (FMSIB): An independent state agency that provides state or federal STP flexible funds, combined with partnership funding, for freight mobility and freight mitigation projects along strategic freight corridors as approved by the legislature and Governor.

Pedestrian and Bicycle Program (Ped/Bike): This program's objective is to improve the transportation system to enhance safety and mobility for people who chose to walk or bike. The state prioritizes and programs projects.

Safe Routes to School (TAP(SR)): This program is to enable and encourage children, including those with disabilities, to walk and bicycle to school; to make walking and bicycling to school safe and more appealing; and to facilitate the planning, development and implementation of projects that will improve safety, and reduce traffic, fuel consumption and air pollution in the vicinity of schools. The state prioritizes and programs projects.

LOCAL REVENUES

Local transportation funding sources are primarily from the property tax for highway projects and the sales tax for transit projects. Other sources of revenue for highway projects include monies from street use permits, gas tax utility permits, overload/legal permits, service charges, plan deposits, interest on investments, rental and sale of real estate, impact fees, and other local option taxes permitted under State law.

Arterial Street Fund (ASF): This is the state gasoline tax distribution to cities and towns. Distribution is on the basis of population.

Transportation Impact Fees: House Bill No. 2929 of the 1990 Legislative session authorized jurisdictions to impose impact fees for transportation facilities on development activity, as a part of the Growth Management Programs.

Fish Lake Trail Connection to Centennial Trail

Finalize design and build a shared-use path connection from the Fish Lake Trailhead near Lindeke to the Centennial Trail via Sandifur Bridge. Phase 1 construction builds the path from the Fish Lake Trailhead at Lindeke north along Government ending near 5th Ave. Phase 1 will also build a pathway from the Fish Lake Trail down the old railroad grade to tie into Thorpe Road.

190/Valley HPT Line Park & Ride Construction

The program includes many elements of High Performance Transit along the I-90 corridor, connecting Downtown Spokane with points east, including Spokane Valley and Liberty Lake. The program includes an expansion of commuter parking capacity east of Sullivan Road (Barker to Stateline) as well as a new Mirabeau Transit Center. Argonne Station Park and Ride is included in the program, conditioned on state funding for 80% of the project costs. As grants allow and travel patterns warrant, freeway "flyer" stations will be included along the line.

Section 5310 Funding for Seniors and People with Disabilities

The projects under this program include both traditional category projects (capital)and "other" category projects (operating). STA issues a Call for Projects to non profits, agencies, and jurisdictions to apply for the funds in accordance with the FTA approved Program Management Plan. The local share amount varies depending on the project type (15% for ADA capital, 20% for capital/mobility management, and 50% for operating/direct services).

Barker @ UPRR Crossing

Reconstruct Barker Rd at UPRR crossing and the offset intersection of Euclid Ave. and provide shared use path from Spokane River to Grade separation project limits on SR290.

CN will be completed in two phases: Phase 1 includes the Shared-use path from the Spokane River to just south of the east leg of the Euclid intersection. Phase 1 funding includes HSIP, FMSIB and local funds. Phase 2 includes the UPRR crossing, offset intersection improvements at Euclid Ave., and the remaining shared-use path from the UPRR crossing to the Barker GSP limits at the north limits of the project. Phase 2 funding includes STP(UL), FMSIB, and local dollars.

Pines and Mission Intersection Improvements

Eliminate split-phase signal timing for traffic on Mission Ave and will reconfigure signal operations. Add right-turn lane from SB Pines to Mission, add dual left turn lanes from EB Mission to Pines and change thru/left on WB Mission to a dedicated left turn lane.

Pines Road/BNSF Grade Separation

Construct a grade-separated intersection for Pines Road (SR 27) at the BNSF railway crossing. The project proposes a Pines Road underpass at the railroad tracks; lowers the intersection and adds lanes at the nearby Pines Road/Trent Avenue (SR 290).

APPENDIX G PUBLIC COMMENTS

1. Date Received Name Method Project/Topic

09/16/2022 Rod D. Social Media Intersection on US 2

Comment

About two years ago I suggested a cure for the Hwy2/Dover Rd difficulty accessing on to or off hwy2 during peak traffic times was to divert Dover Rd, south of the RR crossing, east to join the traffic light for FAFB. Making complete use of that traffic lighted intersection. That fell on deft ears then! But, today with all the new housing builds between 5th Ave, Buckboard Rd, Dover Rd and Christensen Rd coupled with the massive increase of hwy2 traffic, it even more would solve that problem and would be greatly appreciated and beneficial to the taxpayers of Spokane County!

Agency Response:

Forwarded to WSDOT and Spokane County.

Jurisdiction Response:
